EXPERIENCE

Revenue Operations Analyst · JG Wentworth (Remote)

Aug 2024 – Sep 2026

- Developed the **corporate dashboard style adopted by every team** while rebuilding Power BI and Excel reports as HTML on **shared, Airflow-scheduled Snowflake SQL**; helped add an **AI summary (RAG)** to the **morning alert email** naming which metrics suffered and why, built once as a single solution serving all business teams
- Upgraded the **MBR/QBR profitability package** in Excel and Snowflake SQL for the C-suite and VPs, adding a mirrored **interactive dashboard** that expands every summary figure into its underlying detail, bringing line-level evidence into management calls while keeping the **dual Excel and dashboard reporting structure** in sync
- Built separate **weekday and weekend FP&A forecasts** with **time-series regression and day-of-week seasonality** after finding that lead behavior shifted structurally on weekends; the split uncovered a **cheap bucket of Sunday leads** that could be bought low and worked first thing Monday morning, **raising ROI on both days**
- Added a **conversation-data section** to Sales' weekly **Directors Workbook**: parsed call transcripts via **Claude Code and Haiku** into **sentiment, objection, and rebuttal metrics** for rep self-coaching against the sales floor (e.g., weak on "talk to my spouse"), surfacing gaps even among top reps; the metrics spotted **experienced new hires before any enrollment data existed**, a shortcut that cut their **onboarding from 3 months to 1**
- Turned sales leaders' recurring questions into a **marketing-by-sales view** with lead-source filters, showing whether marketing's lead supply matched sales capacity in **15-minute cohorts**; it surfaced two **timing gaps**: (1) evening leads waited on too few Pacific-time reps, **closed with late-shift coverage**, and (2) morning **Google paid-search leads went cold before first contact** because channel prioritization ignored arrival hour

Summer Analyst, U.S. Private Bank (Asset & Wealth Management) · J.P. Morgan

May 2024 – Aug 2024

- Built a **branch-referral tracker** in **Python, Excel, and VBA** for high-net-worth U.S. and international clients who walk into Chase branches in Austin, Miami, Nashville, Los Angeles, and Chicago, logging transfers by branch, outreach, and materials supplied; it connected Private Bank bankers with **Chase regional directors** for a smoother client journey, **brought in 2 new clients** during the internship, and **stayed in use after it ended**
- Built the **cash-redeployment pipeline** for every banker and investor on the floor ahead of expected **Fed rate cuts**, with filters ranking clients by idle cash in **Excel (Office Script)**; in client meetings, **Monte Carlo forecasts** projected how each current portfolio would unfold with no changes, making the case for moving into gold and other assets as cash yields fell; the pipeline helped move **\$750M from cash into invested assets**
- Co-built an **AI prospect-research app** with interns and analysts on the **ChatGPT API**: bankers enter a name and any known details, and it searches and scrapes Google, LinkedIn, Reddit, and social platforms into one profile; owned the **API integration and source-verification layer** keeping results accurate and cited, and the summer-long project **won 1st of 12 eight-person teams**, presented at the J.P. Morgan morning meeting
- Handled **client communication** for the banker and investor team, answering inquiries with J.P. Morgan materials and up-to-date **macroeconomic and market analysis** from the **Bloomberg Terminal**; kept each client's follow-up stage current in a **weekly report** on market moves, client activity, and banker outreach progress

Legal Assistant Paralegal · David W. Chefec

Nov 2022 – Apr 2024

- Designed and maintained an Excel **case and deadline tracker** covering every active matter's stage, filing deadlines, and next step, giving the attorney a single, up-to-date view of the full caseload and upcoming filings
- Drafted and prepared **filings, forms, and client correspondence** for attorney review, and ran client intake, calls, and follow-ups from first contact through final submission, keeping clients informed at every stage of their case
- Managed the firm's **billing and collections reporting**: prepared and issued client invoices, tracked incoming payments, and produced regular summaries of outstanding balances and collections for the supervising attorney

EDUCATION

BBA, Business Analytics (STEM), Minor in Finance · Hofstra University

May 2025

- GPA **4.0 (major) / 3.98 (cumulative)**; Honors College, Degree with Distinction; **Presidential Scholarship**; Best Paper, Journal of International Business & Law, "Homes for Profit" on housing affordability (2025)

SKILLS

Revenue Operations: forecasting (time-series regression), pipeline and funnel analysis, conversion analysis, rep-level performance tracking, MBR/QBR reporting, scenario modeling, dashboard design, process documentation

Tools: Excel (advanced modeling, VBA, Office Script), Google Sheets, Salesforce, SQL (Snowflake), Airflow, Tableau, Power BI, Python (pandas, scikit-learn), HTML and JavaScript reporting, Git/GitHub, Bloomberg Terminal

AI: Claude Code, Claude API, ChatGPT API, RAG, LLM-based sentiment and rebuttal scoring, prompt engineering
